

SELLING NETWORK SERVICES: A SMART MOVE

The channel is changing dramatically. Hardware and software margins are shrinking as computing morphs from the desktop to the cloud. And the growth of the cloud, as well as other technology apps, has put a huge demand on bandwidth. Companies not currently offering network services as part of their portfolio are missing out on a huge opportunity.

DEMAND FOR NETWORK SERVICES IS GROWING

CONNECTING MORE DEVICES

There will be more than 55 billion Internet of Things (IoT) devices by 2025, up from about 9 billion in 2017.¹

INTERNET OF THINGS

IoT is expected to grow from \$800 billion in 2017 to \$1.4 trillion by 2021.²

CLOUD COMPUTING BOOMING

Global IP traffic will increase nearly threefold over the next 5 years, and will have increased 127-fold from 2005 to 2021.³

WiFi SURPASSING WIRED

By 2021, wired devices will account for 37 percent of IP traffic, while WiFi and mobile devices will account for 63 percent of IP traffic.³

DIGITAL UNIVERSE

By 2020 the digital universe will contain nearly as many digital bits as there are stars in the universe – it is doubling in size every two years.⁵

MORE DEVICES THAN PEOPLE

By 2021 there will be 1.5 mobile devices per capita. There will be 11.6 billion mobile-connected devices by 2021.⁴
